Male Attendee Details (Please provide all relevant sizes, preferably in feet & inches)

How to Measure Your Outfit

How to Measure – Kilt

1. Your Height

Measure head to toe in **Feet & Inches**.

Providing your height measurement gives us the opportunity to check that your kilt length measurements are correct.

2. Kilt Waist

For the Kilt Waist, measure in **Inches**, around at the gents navel. This is the natural waist size / measurement.

Men tend to breathe in when getting measured so ensure they are relaxed and breathing out.

3. Kilt Length

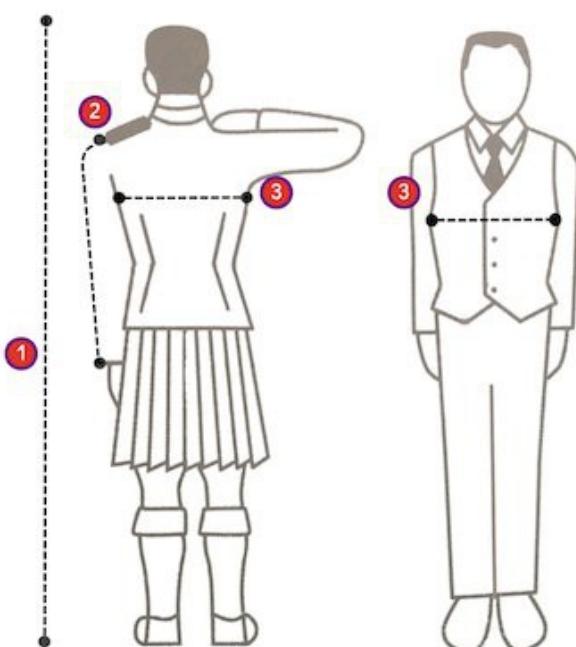

Measure from the navel to the centre of the knee in **Inches**.

To check the Kilt Length measurement, ask the man to kneel down with his back straight, and his head looking forward. Then measure from his navel to the floor.

4. Kilt Seat

Measure the widest part of the hips/seat in **Inches**.

How to Measure – Jacket

1. Your Height

Measure head to toe in **Feet & Inches**.

Providing your height measurement gives us the opportunity to check that your Jacket length measurements are correct.

2. Sleeve Length

Measure in **Inches** from crown to cuff (shoulder to wrist) with the arm down by your side.

3. Chest Size

Measure in **Inches** around the broadest part of the chest keeping the tape up under the arms.

Keep one finger between the tape and the body.

This makes the tape slightly loose so it can move around the body freely.
